

Completion of the Datawire VXN Compliance Test

This is to certify that the following has successfully completed their Datawire VXN Compliance Testing and is authorized to proceed to schedule and perform any Processor specific Validation / Certification Test requirements:

Date Completed: November 2, 2006

Vendor: /n software

Product Name: IBiz FDMS Integrator

Product Version: 1.0

Datawire VXN API: Datawire VXN® XML Interface Reference Guide (vxnapi_xml_3_2_0_10)

Platform(s): IPN-FDMS North

Listed on MAS as: /n software – **IBiz FDMS Integrator**

Datawire Application Compliance Criteria:

- Datawire VXN with Self-Registration Service (SRS) functionality.

Note: Multi-Merchant support functionality.

- Setup and configuration of VXN specific parameters.
- Success path of Authorization type transactions.

Note: All authorizations use the VXN Simple Transaction method. All Settlements use the VXN Session Transaction method (InitiateSession (empty payload), SessionTransaction(s), and TerminateSession (empty payload))

- Datawire VXN Error reporting and handling requirements.
- Datawire VXN Client Edge Node Access Management requirement.

Note: It is the responsibility of the Vendor to ensure that the Datawire ID is stored securely.

The test data collection and compliance test has been performed using the /n software - IBiz FDMS Integrator v1.0 product.

Conditions of Compliance

It is the responsibility of the vendor to ensure the Datawire Compliance Testing is scheduled at the end of the application's design cycle in order to minimize the risk introduced by potential code churn. Datawire VXN Compliance will remain in effect until modifications to the application software or payment engine are made that could impact the Datawire VXN Compliance Criteria outlined above. At that time it is the responsibility of the Vendor to inform Datawire of such modifications and if required, a re-certification session will be scheduled.
